

About the Scan Function of Printer For Mac OS 10.15 Driver

PREFACE

On October 8th, Apple® released OS X 10.15 for Apple Mac® products. Fuji Xerox offers a wide variety of print drivers, scan drivers, and software, for existing and new Apple Mac® products. This document outlines the support scope for OS X 10.15.

Scan Function Compatibility/About the Control Centre

Starting with Mac OS X 10.15, 32-bit apps are no longer compatible with Mac OS. ControlCenter 2 Application & TWAIN drivers, which helps Fuji Xerox users to Scan function on an Apple Mac® product will not be functional with the recent Mac OS X 10.15 update. The ControlCentre 2 & TWAIN are the 32bit application.

Fuji Xerox recommends using Image Capture App (ICA) as an alternative solution for scanning. Models that supports iPrint&Scan and AirPrintScan will not face any disruption in Mac OS X 10.15.

Please refer to the chart below for the compatibility matrix of each models.

Product Model	Product ID	ICA Support	iPrint&Scan & AirPrintScan
