

How to Create a Job Template

GP Controller for ApeosPro C810/C750/C650

Version 1.0

FUJIFILM Business Innovation Corp.

Overview

This exercise will demonstrate the ability to save pre-defined job properties as a Job Template and apply the Job Template to Logical Printer-Hot Folder and jobs.

This demonstration will use the example of changing the default RIP Type from CPSI (Configurable PostScript Interpreter) to APPE (Adobe PDF Print Engine).

Please note that this option has been selected for demonstration purposes only and that the main concept of creating a change to the default options can be applied to any option within the Job Properties window. Job Templates is an effective way of applying commonly used functions to multiple jobs in a production environment

Objective

By the end of this exercise users will be able to:

- Navigate to the location of the setting on GP Controller
- Create a new job template
- Apply the Job Template to a Job

Create Job Template

- 1. Open PrintStation, then log in as an Administrator.
- 2. Select Queues, then select Job Templates.

3. Click + icon (Create New).

4. Enter Template Name and click Edit Job Properties.
