

# How to Manage jobs Using Folders

# GP Controller for ApeosPro C810/C750/C650

Version 1.0

FUJIFILM Business Innovation Corp.

#### Overview

This exercise will demonstrate the ability to manage jobs by using the Folder feature of the GP Controller. The user can create Folders and easily store jobs in the folder by dragging & dropping files. This exercise will also demonstrate the way Folders can be used to filter jobs.

### Objective

By the end of this exercise users will be able to:

- Find the location of the setting on GP Controller
- Create a new Folder
- Store jobs in Folder by Dragging & Dropping files
- Filter jobs using a Folder

#### Create a Folder

1. Click the [Create Folder) button in the 'Job Filter' area.

Congratulations you have now completed the task of creating a Folder. Please continue to the next exercise of storing jobs in a Folder.

#### Store Jobs in a Folder

1. Select the required jobs in the Job List, and drag & drop them in to the Folder where you want them to be stored.

You can also store jobs in a folder by selecting the jobs to move, right-click > Move To, and then select a destination folder from the list of folders.
