How To Apply Adjust Invert Text/Line Weight

GX Print Server for PrimeLink™

Version 1.0

FUJIFILM Business Innovation Corp.
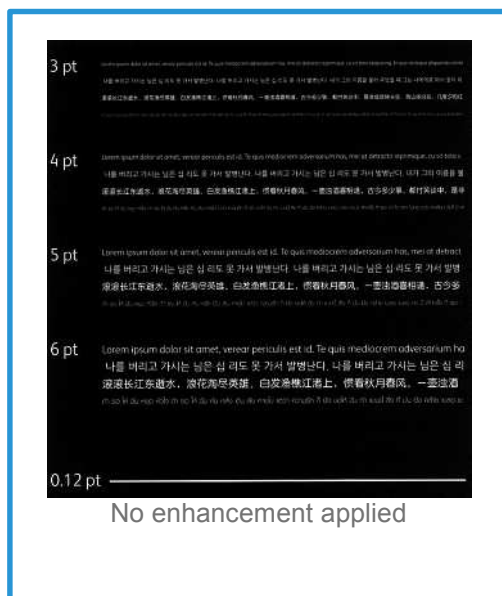

Overview

This exercise will demonstrate the ability to make changes to the default "Adjust Invert Text/Line Weight" setting. This feature is able to modify the outline to a specified density and achieve clearer, sharper printed results for text/line elements. It can be used to improve image quality when a design has reversed text and fine lines (i.e white text on a black solid).
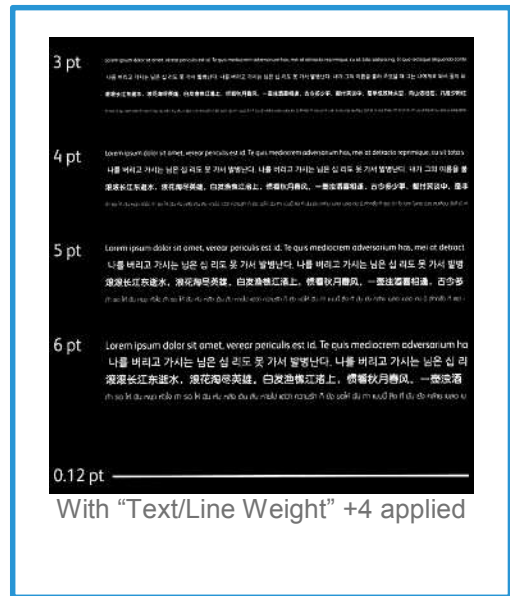

Objective

By the end of this exercise you will be able to:

- Find the location of the setting on the GX Print Server
- Make an adjustment to the default value
- Compare the results

BEFORE

No enhancement applied

AFTER

With "Text/Line Weight" +4 applied

Adjust Invert Text Line Weight

i Print a sample file with the default setting before making the following adjustment.
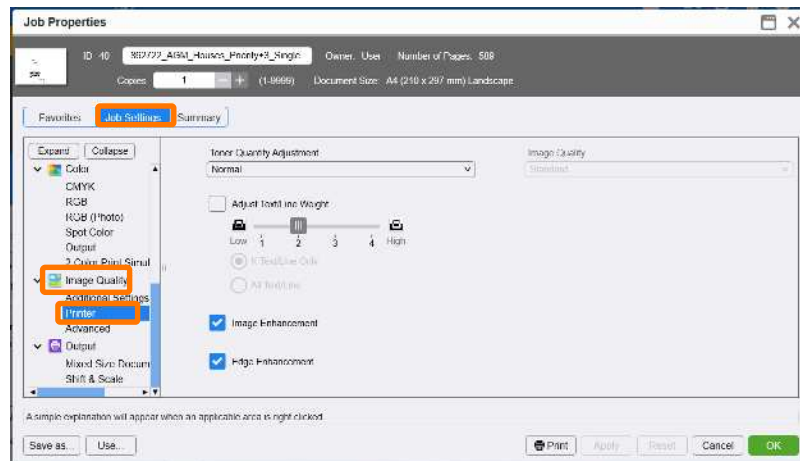

1. In the shortcut area, select [Import Jobs].

2. Select a sample job to import

3. Select [Hold] in [Operation After Importing] and [template_default] in [Template] and then click [OK].

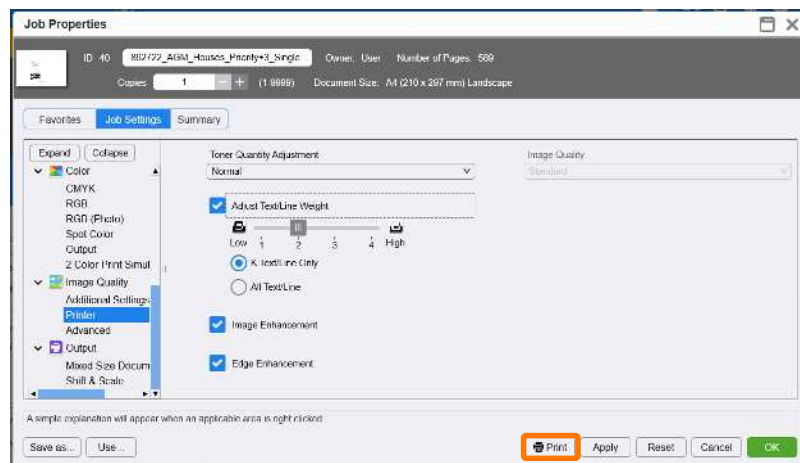

4. Double-click the imported job to display job property.

5. Select **[Job Settings]** > **[Image Quality]** > **[Printer]**.

6. Choose the required level of **[Adjust Invert Text/Line Weight]**.

7. Click **[Print]** to print.

> ℹ️ Print a sample file with your new settings to compare to the defaults.

Congratulations you have now completed this exercise.
