

How to Use the Sharpness Feature

Revoria Flow PC11 for Revoria Press PC1120

Version 1.0

FUJIFILM Business Innovation Corp.

Overview

This exercise will demonstrate the ability to make changes to the Sharpness setting on Revoria Flow PC11. This feature can be used to improve the image quality of both Photos (Bitmap elements) as well as Text & Line work (Vector elements). The printed effect is like the results achieved when sharpening is applied in pre-press, using desktop publishing software.

Objective

By the end of this exercise users will be able to:

- Navigate the feature on the Revoria Flow PC11
- Make an adjustment to the default value
- Compare the results

Sharpness for Images

1. In the Shortcut Area, select Import Jobs.

- 2. From the Import Jobs window (pop-up window), select the file you want to import. There might be an instance that you will need to browse through the folders to select your file.
- Still on the Import Jobs window on the left side, under Job Properties > Template select template_default. On the same screen under Operation After Importing, select Hold Jobs, then press OK.

Import Jobs
