# Revoria Flow PC11 for Revoria Press PC1120

FUJIFILM Business Innovation Corp.

#### Overview

This exercise will demonstrate the ability to make changes to the default Adjust Text/Line Weight setting. This feature can modify the outline to a specified density and achieve clearer, sharper printed results for text/line elements. It can be used to improve image quality when a design has reversed text and fine lines (i.e white text on a black solid).

## Objective

By the end of this exercise users will be able to:

- Navigate the feature on the Revoria Flow PC11
- Make an adjustment to the default value
- Compare the results
